

## **DOVE™ Polygon Scanner - 15mm Aperture @ 8K RPM**

### **Multi-Kilowatt Laser Damage Threshold!**

**DOVE™** is an intermediate size polygon laser scanner with a top speed of 8,000 RPM. Polygon scanners produce a linear scan speed of up to hundreds of meters per second which can be >10x galvanometer speed. The 15 mm aperture is suitable for material processing at >5KW as well as LIDAR, inspection, imaging and other high-speed raster scanning applications. The Sapphire protected gold coating is especially durable.

Need polygon speed but not familiar with how to implement polygon scanning technology? Precision Laser Scanning provides the tools to help you quickly implement a polygon scanner. That includes:

- Start Of Scan detection.
- Synchronize laser to polygon.
- Synchronize galvo or stage and laser to polygon.
