## TeraSys ${ }^{\circledR}$ - AiO

## The flexible solution for THz spectroscopy

The TeraSys ${ }^{\circledR}$ - AiO provides a flexible solution for laboratory THz spectroscopy and imaging. It offers maximum flexibility with measurement capabilities in transmission and reflection without realignment of the optics. It is based on organic crystals, to allow access to terahertz frequencies not available with conventional antennas. The TeraSys ${ }^{\circledR}$ - AiO includes all optical, mechanical and electronic components for the generation and detection of THz waves such as delay line, terahertz generator, terahertz detector, pump source optics, electronics, humidity sensor, purge chamber, dedicated software, and laptop.
